DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, claims 13-21, drawn to a powder binder.

Species II, claims 22-27, drawn to a strand binder.

If species I is elected the following sub-species election is required:

Species I-A, claims 14 and 15, drawn to a powder binder in a dry state.

Species I-B, claim 16, drawn to a powder binder in a liquid vehicle.

Species I-C, claims 17 and 18, drawn to a powder binder and a soluble adhesive in a liquid vehicle.

Species I-D, claims 19-21, drawn to a powder binder and a secondary thermoplastic adhesive.

Claim 13 is generic to species I.

If species II is elected the following sub-species election is required:

Species II-A, claims 23, 24, and 26, drawn to a binder strand disposed between the pile loops.

Species II-B, claim 25, drawn to a stitching thread that includes the binder strand.

Species II-C, claim 27, drawn to a binder strand in a liquid vehicle.

Claim 22 is generic to species II.

Art Unit: 1733

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-12 are generic.

3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

4. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. During a telephone conversation with Mr. George Medwick on 6/13 a provisional election was made with traverse to prosecute the invention of Species I, claims 13-21.

Affirmation of this election must be made by applicant in replying to this Office action. Claims 22-27 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention. However, as noted above a further sub-species election is

Art Unit: 1733

required. A telephone call to Mr. Medwick on 7/8 did not result in a sub-species election. It is noted that upon the indication of allowable subject matter, rejoinder will be considered.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **John L. Goff** whose telephone number is **703-305-7481**. The examiner can normally be reached on M-Th (8 - 5) and alternate Fridays.
